THE BUILDER'S CHOICE FOR THE ULTIMATE LED DOWNLIGHT

8LIGHTING.COM

PBX/24 BOOTH #E21P

Stands the Test of Time

Concrete structures are designed to last for centuries. Unlike other materials, concrete only gets stronger over time.

Simple to Use

If a material isn't easy to use, it doesn't matter how strong it is. Good thing concrete can be molded into any shape, size or design you can imagine.

Peace of Mind

Building with concrete gives you a fire resistant structure. When combined with other fire safety systems, you can exceed building requirements—instead of just meeting them.

Value That Lasts

Concrete won't rot, mold, rust or deteriorate. It's energy efficient and virtually maintenance-free—which means the resources you invest now will last for decades to come.

Strength. It's a term that gets used a lot. And while it's one of the most essential components of any building, it's more than the strength itself that's important. It's the benefits of strength that make a difference in what you build.

Locally Produced. Readily Available.

CEMENT AND CONCRETE PRODUCTS INDUSTRY OF HAWAII

WELCOME TO PBX Hawai'i

ALOHA

AIA Honolulu, CSI Honolulu Chapter, and the General Contractors Association of Hawaii have teamed up to produce this year's edition of PBX Hawai'i, the state's premier annual trade show for the construction and design industries.

Bringing together the strengths and talents of these three leading organizations, we are excited to welcome Hawai'i's architectural, engineering and construction professionals to the Hawai'i Convention Center on October 2nd for a day of education, product knowledge, and networking opportunities.

You will be pleased to know that PBX 2024 is holding the line on inflation and shrinkflation: The wallet-friendly registration fee remains the same as 2023 and includes the same terrific value for your investment: 16 insightful and timely seminars presented by local and mainland experts; a product showcase of 200+ exhibitor booths; and opportunities to mingle and network with industry peers, including our popular Pau Hana Celebration with tasty pupu, prize drawings, and the 3rd Annual PBX Jeopardy Challenge between industry associations.

We extend sincerest appreciation to our dedicated committee volunteers and consultants and a big "mahalo" to our exhibitors, sponsors, seminar presenters, and many other industry partners who contributed to the success of PBX 2024.

Thank you for joining us on October 2nd. Enjoy the show!

PBX 2024 Management Committee, front row, from left: Cheryl Walthall, Lance Wilhelm, Carol Torigoe. Back frow, from left: John Fullmer, Reid Mizue, Julia Fink, Tim Waite

The PBX admission fee includes:

- 200+ vendor booths
- Access to 16 expert-led seminars with AIA LU and HSW credits
- Voucher for Lunch Concession/1801 Café (\$10 value)
- AIA Honolulu 2024 Annual Business Meeting
- Hosted Pau Hana Celebration with great prizes and pupul

A Note About Parking: Other events are taking place at the Hawai'i Convention Center on Oct. 2; onsite parking will be limited.

CameraPay

We encourage attendees to rideshare, bicycle or Biki when possible. Convenient discounted parking for HCC event attendees is available nearby at Ala Moana Center's Premium Parking location P1706. Scan QR code or Text P1706 to 504504. Use Promo Code "HCC22" for 50% discount.

LEARN & EARN

16 Sessions | 4 Tracks | AIA LU and HSW CREDITS

earn from industry leaders and peers and gain inspiration as they share their experience and expertise on topics that are timely and relevant for all segments of the AECO industries.

Most sessions earn 1 AIA LU; many also qualify for HSW credit.

Admission badge is required for entry to seminars. Topics and speakers are subject to change.

'EKAHI (TRACK 1) -**DESIGN AND PRACTICE**

Session 1A

Kūlanihāko'i High School: **Striving for Net Zero Energy: AIA Honolulu Award of Excellence Winner!**

Presented by AIA Honolulu

This new DOE campus on Maui showcases the best practices of sustainable design. The project aims to achieve net zero energy by harnessing the natural resources of the site, such as sunlight, wind, and rain. The presentation will cover how the design team explored and applied various passive green strategies throughout the campus, including solar shading, natural ventilation, rainwater harvesting, and native landscaping. The project will serve as a model for future DOE projects in Hawaii and demonstrate how sustainability and good design can go hand-in-hand.

PRESENTERS Ryan Sullivan, AIA

LEED AP Associate Principal, G70

Ryan focuses on conceptual design and creative thinking. He brings his

vision and more than two decades of experience to G70's myriad project types and typologies. Ryan advocates for thoughtful and meaningful design in the built environment to

munity as well as the clients he is fortunate to interact with.

enrich and inspire the greater com-

Kaneshiro, AIA, **LEED AP** President and COO.

Charles specializes in the planning and design of educational and insti-

tutional facilities. As one of the first LEED accredited professionals in Hawai'i and 2007-09 Green Schools advocate for the USGBC Hawai'i Chapter, Charles has a passion for designing sustainable buildings that improve the health of occupants and reduce our carbon footprint.

Session 1B Reviving Lāhainā: Hoʻōla Lāhainā Proiect

Presented by AIA Honolulu

The mission of the Ho'ola Lahaina Project is to provide the community with exceptional designs that are affordable and efficient to build: meet the needs of individual families; and collectively reflect the original charm and character of old Lāhainā town. The project team is also providing pro bono support with building permit application and processing. The discussion will include permitting, residential design considerations and community collaboration, and evolving county and state policies related to the redevelopment of Lāhainā town.

PRESENTER

Atom Kasprzycki, **AIA**

Partner / Principal Architect, Kasprzycki Designs, Inc.

Growing up in a family of artists, Atom has been

around creation and expression most of his life. Atom started in construction working his way up from the bottom eventually obtaining a general contractors license. He continued his professional development, shifting focus to architecture, apprenticing under mentor architects and structural engineers, eventually becoming a licensed architect.

Session 1C

NAVFAC's Shipyard Infrastructure Optimization Program & USACE's Upcoming Programs

Presented by S.A.M.E.

Presenters will provide an overview of the mission, organization, capabilities, and programs of their respective organizations and also will cover potential upcoming design, construction and engineering opportunities for the AEC industry.

PRESENTERS CAPT Stephen T. Padhi, PE Commanding Officer, OICC Pearl Harbor Naval Shipyard

CAPT Padhi

served as the Operations Officer for major construction programs at Camp Pendleton and the Naval Surface Warfare Center (NSWC) Philadelphia Division. He was instrumental in developing the Shipyard Infrastructure Optimization Program (SIOP) in NAVFAC's first-ever Program Executive Office with PEO Industrial Infrastructure and PMO 555.

Joanna T.S. Victorino, PE Director, SIOP Dept. at Pearl Harbor Naval Shipyard

As the first SIOP Department Director for PHNSY, Joanna

Officer for SIOP, which is a holistic program that integrates all infrastructure and industrial equipment investments to meet nuclear fleet maintenance requirements.

LTC Adrian Biggerstaff, PE Honolulu District Commander, U.S. Army Corps of **Engineers**

Lieutenant Colonel Adrian Biggerstaff

became the 74th Honolulu District Commander on July 10, 2024. Biggerstaff holds a Bachelor of Science in Civil Engineering from the United States Military Academy, Master of Science degrees in Environmental Engineering (Missouri S&T), Management

Science (Stanford University), and Civil Engineering (Stanford University), and a Ph.D. in Civil Engineering from Stanford University.

Session 1D

Punalu'u Stream Restoration Project: ACECH Engineering Excellence Award Winner!

Presented by ACECH

Punalu'u was once described as a 'place of abundance' and was a thriving agricultural ecosystem. A range of historical impacts over the years led to extensive flooding and neglect of the area, causing great economic hardship. The Punalu'u Stream Restoration Project incorporated Kamehameha Schools' ahupua'a management strategy to provide flood mitigation and restore natural ecological form and process. The project design restored the

Hawaii's Full-Service Lighting & Lighting Control Manufacturers' Representative

- · Project management
- Local product inventory
- · Quick quote desk
- · Specification support
- Lighting controls applications support
- · On-demand lighting control field service
- · Lighting photometric layout services
- Education

FIELD SERVICE LIGHTING CONTROLS

Education and assistance on installing first-in-class lighting controls system.

- · Lighting controls take-off
- · Site specific wiring controls diagram
- · Pre-construction meetings
- · Start-up and commissioning
- · End-user training
- · Lighting controls education

LIGHTING LAYOUTS

Assisting Architects, Lighting Designers and Electrical Engineers with:

- · Lighting calculations for normal and path of earess
- · Provide 2-D plans and 3-D renderings
- · Design build assistance
- Lighting/Illuminance heatmaps
- · Project ROM and pricing

Offering end-to-end solutions that accelerate the transition to sustainable & renewable energy.

- · Project feasibility & proposal
- Specification design
- · Financial analysis
- · Regulatory compliance
- · Energy storage implementation
- · System organization
- · Project management

SEMINAR GUIDE

natural valley floodplain and terraces, relocated farmers from flood-prone lands to elevated terraces, and reconnected Punalu'u Stream with its floodplain, enhancing the ecosystem's health and resilience and protecting cultural and natural resources.

PRESENTERS Martin Nakasone. PΕ

Vice President & Area Manager, AECOM

Martin brings over 30 years of experience in civil engineering

that includes roadway, sewer, water, grading and drainage systems, site development, cost assessment, and master planning. As area manager for AECOM Hawai'i-Pacific Islands. he oversees a diverse team that

provides design and engineering solutions for our municipal, federal, and private clients.

Jesse Frey Senior Capital Program Manager, Kamehameha Schools

Jesse has 20 years of experience in project management, engineering

design, construction management, environmental compliance, and environmental remediation throughout his career. Jesse has managed the execution of a wide portfolio of large-scale, multi-faceted civil and environmental construction projects, most recently the Punalu'u Stream Restoration Project from planning to completion.

'ELUA (TRACK 2) -**CLIMATE ACTION PLANNING AND** CONSTRUCTION

Session 2A

Hawai'i Housing Design Toolkit Presented by AIA Honolulu

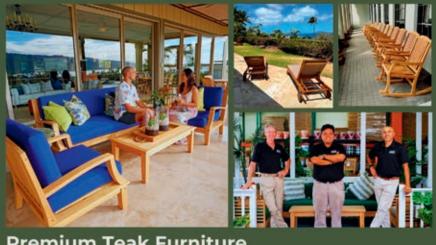

The quest for affordable housing has often resulted in overcrowded buildings, the proliferation of units with minimum dimensions, the use of bottom-of-the-line materials, the absence of amenities, and dwelling spaces that are barely adequate. How might we explore alternative processes or hyper-localized approaches in order to achieve more walkable, sustainable, and equitable communities?

This session will present the Holistic Housing Design Toolkit, a collection of tools and resources developed through a bottom-up research collaboration with the Hawai'i Public Housing Authority, aimed at inspiring future designs, informing redevelopment processes, and supporting community engagement activities in the future planning of mixed-income / mixed-finance housing.

PRESENTERS

Karla Sierralta, AIA

Associate Professor. University of Hawai'i at Mānoa School of Architecture

Karla is an associate professor at the School of Architecture at the University of Hawai'i at Mānoa where she serves as the director of undergraduate studies, coordinates the Design Fundamentals Studio, and teaches advanced courses that explore the process and agency of design with a particular focus on cross-cultural narratives, social justice, and dwelling.

Brian Strawn, AIA

Director, Office of Planning and Spatial Experience, University of Hawai'i

Brian is an architect and design

researcher specializing in humancentered design, systems-based

design, and design strategy. He serves as the inaugural director of the Office of Planning and Spatial Experience at the University of Hawai'i, where he leads efforts

centered on imagining the physical and digital realms of the campus of the future.

Session 2B

No Fear of Commitment: Insights from Hawai'i 2030 **Commitment Signees**

Presented by AIA Honolulu

With the building sector standing out as the largest single contributor to climate change, the AIA 2030

Commitment is a tool for change. As a catalyst for climate action, the Commitment equips architecture firms with measurable decarbonization targets and tracking tools to achieve portfolio-wide carbon neutrality by 2030. Representatives from Honolulu firms at different stages of implementing the Commitment will share their lived experiences, challenges, and how the Commitment has transformed their approach to architectural design and climate change in Hawai'i.

PRESENTERS Jill Edelman, AIA,

LEED BD+C Founder, DRaGonfly Regenerative Architecture &

is an architect and regenerative

Trenchless Solutions Built with Trust

From energy delivery systems to water and wastewater pipelines to offshore wind construction, Michels designs and builds infrastructure solutions to deliver critical services to Hawai'i and the Asia Pacific region.

development practitioner with over 20 years of experience. DRaGonfly Regenerative Architecture & Design is a mission-driven firm dedicated to shifting the practice of architecture to meaningfully address climate change through regenerative design.

Melanie Islam, AIA, NCARB, LEED AP BD+C, LFA

Principal & Sustainability Director, Mason

Ms. Islam is a Principal and

Sustainability Director at MASON. She is driven to work on projects that improve communities and thrives on opportunities that guide smart choices in developing

climate-responsive buildings that adapt to evolving climatic conditions while working to draw down both operational and embodied carbon emissions.

Matt Loudermilk, Assoc. AIA

Designer, AHL

Matt is a systemsthinking designer seeking to mend the inherited oppositions within our natural and urba ment. Since joining A

our natural and urban environment. Since joining AHL, Matt has supported the Commitment through data documentation, performance communication, and project team design data literacy to more effectively consider energy in decision-making.

Jay Moorman, AIA, NCARB Lead Sustainability Coordinator, KYA Inc.

Jay manages KYA's adoption of the AIA 2030 Commitment and developed KYA's

Sustainability Action Plan. As lead sustainability coordinator, he conducts research, provides education, and facilitates the implementation of sustainable design strategies with an emphasis on resiliency.

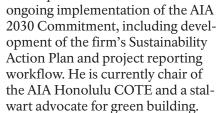

Scott Schwarzwalder, AIA, LEED AP BD+C

Associate / Project Architect, G70

Scott recently led G70's successful adoption and

Presented by AIA Honolulu

The expanding use of wood-frame construction for mid-rise projects is allowing architects to creatively achieve multiple, simultaneous objectives, with a significant increase in the use of off-site construction methods for wood-frame multifamily and commercial buildings. Wood buildings of five, six and more stories are rising among traditional concrete and steel shells as designers and developers embrace both wood and mass timber's vast potential for faster installation, and a significantly lighter carbon footprint. This session will illustrate code-compliant opportunities and trends in low- to mid-rise wood-frame construction.

PRESENTER Kate Carrigg, PE WoodWorks Reaional Director – HI, OR, ID-South Kate provides education and assistance toward

the use of wood

and mass timber in commercial and multifamily construction. With backgrounds in structural engineering and construction management, she brings a unique perspective to

projects she assists with. Kate has extensive experience with a multitude of successful projects ranging from commercial mass timber to multifamily light-frame podium.

Session 2D Building Community in Kaka'ako and Kalaeloa: HCDA's **Zoning Updates**

Presented by AIA Honolulu

The Hawai'i Community Development Authority (HCDA) is implementing new rules in Kalaeloa and Kaka'ako that will promote healthier, safer, and more sustainable and equitable communities. The new rules will streamline and speed up many types of zoning reviews while creating more regulatory consistency across HCDA's districts. The new

rules will also introduce a requirement to consider climate change and sea-level rise that will improve resiliency and community welfare.

PRESENTER

Ryan Tam Director of Planning

and Development, Hawai'i Community Development Authority

Ryan oversees zoning and supports

transit-oriented development infrastructure planning efforts at Hawai'i Community Development Authority. Ryan was previously the director of planning at the Honolulu Authority for Rapid Transportation.

'EKOLU (TRACK 3) - CONTRACTING

Session 3A E 'Ōpū Ali'i - The Heart of Leadership

Presented by GCA of Hawaii

In ancient Hawai'i the ruling class, or ali'i, had jurisdiction over small segments of land, a whole island, or the entire Hawaiian archipelago. The lessons passed down through stories of their lives and reigns serve to inform and inspire Hawai'i's leaders today. "E 'Ōpū Ali'i" is an 'olelo no'eau, or wise saying that makes reference to the heart of an ali'i. This short phrase encourages those to whom it is spoken to adopt the heart and soul of our ancient rulers and apply them to the most pressing leadership challenges we face today.

PRESENTER

Lance Wilhelm *President, The Wilhelm Group*

Lance's construction experience began in 1989 and he has held virtually every line

responsibility within the industry. Before establishing his own consulting and management firm, Lance most recently was managing principal for Irongate. Lance and his TWG team are involved in a wide variety of projects in both the public and private sectors, in engagements that range from early-stage development to construction management.

Session 3B Blueprint Reading - Just the Basics

Presented by GCA of Hawaii

Do you find a set of plans that is 500 – 1000 pages overwhelming? This brief overview of blueprint reading may help and will include just the basics: types of drawings, design disciplines, scales used on drawings,

drawing sizes, interpreting various symbols and notations, navigation through drawings, and more.

PRESENTER

Colleen FuruyaProject Engineer,
Mass. Electric
Construction Co.

Colleen has worked for over 40 years in Hawai'i and on the main-

land for subcontractors and general contractors. She has been with Kiewit / Mass. Electric for 25 years. Over the years, Colleen has done shop drawings, project engineering, and project management duties.

Session 3C Grow your Business through

Cybersecurity Maturity Presented by GCA of Hawaii

Hawai'i's general contractors, the trades, architects and others must comply with cybersecurity requirements to secure federal projects to grow and diversify their businesses. Yet many small and midsize businesses struggle with being able to demonstrate compliance, which disqualifies them from doing business with the military. With an estimated \$1.55 billion in military construction allocated for Hawai'i in FY 2025, the most of any state, Hawai'i companies must be prepared to meet these new cybersecurity requirements. This presentation will focus on the requirements for CMMC compliance and resources that are available to help Hawai'i businesses.

PRESENTER

Al Ogata *President & CEO, CyberHawaii*

CyberHawaii is a local nonprofit organization that helps small and midsize

businesses and consumers build

resiliency against cyber threats. Under Al's leadership, CyberHawaii collaborates with state and federal government agencies, including the Cybersecurity and Infrastructure Security Agency (CISA) and the FBI to deliver timely, practical solutions to protect against cyberattacks and mitigate their impact.

Session 3D

Building Tomorrow Together: Explore the AIA-ACECH-GCA Committee

Presented by GCA of Hawaii

Join this exciting and informative session to learn about the AIA-ACECH-GCA Committee, a dynamic collaboration between the American Institute of Architects Honolulu Chapter (AIA), the American Council of Engineering Companies of Hawaii (ACECH), and the General Contractors Association of Hawaii (GCA). Discover how these leading associations work together to advance the built environment, promote professional excellence, and address key industry challenges. We will delve into the committee's priorities, current initiatives, and the significant impact you can make by getting involved.

PRESENTERS

Eddie Ebert, AIA NCARB LEED AP Principal Architect & Team Leader, RIM | A GHD Company

At RIM | A GHD Company, Eddie Ebert leads the

Hawai'i office of 20 people, including seven licensed architects. With 26 years of experience, including 22 in Hawai'i, Eddie specializes in comprehensive architecture, sustainable design, and branding services. Eddie is an active member of AIA Honolulu as a past board member and current AIA/ACECH/GCA Committee chair.

Kyle Kaneshiro, PΕ

Principal, The Limtiaco Consultina Group

Kyle Kaneshiro is a Principal at The Limtiaco Consulting Group

and helps to lead their design and construction management divisions. With over 29 years of civil and sanitary engineering experience, Kyle specializes in site development and wastewater facilities design. Kyle is the immediate past president of the American Council for Engineering Companies Hawai'i (ACECH) and an AIA/ACECH/GCA Committee Co-Chair.

Heather de la Garza Preconstruction

Manager, Albert C. Kobayashi, Inc.

As the preconstruction manager at ACK, Heather

is responsible for overseeing the estimating department and ensuring that project planning and budgeting run smoothly. With a knack for a collaborative style, Heather works with everyone involved to hit project goals and deliver great results.

Heather is a co-chair of the AIA/ ACECH/GCA Committee.

'EHĀ (TRACK 4) - NEW **PRODUCTS & TRENDS**

Session 4A Innovative Fire-Rated Glazing Technology

Sponsored by Safti First

Architects have always pushed the limits of what building products can do, and fire-rated glazing is no exception. This program shows how fire-rated glazing has evolved from small door lites and openings using wired glass and ceramics to floor-to-ceiling and wall-to-wall, multi-tasking fire resistive glazing

systems. Case studies showing these innovative design applications in real-world settings will be used to show participants how architects continue to push the boundaries of what fire-rated glass can do.

PRESENTER Michelle Murray

Architectural Sales Representative, Safti First

Michelle Murray is a dynamic presenter who has over 15 years

of experience in the architectural glazing industry. She brings her extensive knowledge and expertise of fire-rated glazing systems and fenestration in general when working closely with architects, specifiers, glazing contractors and code officials.

Session 4B

Acoustical Performance of Fire Rated Demising Walls

Sponsored by CEMCO

The next wave of construction defect claims is here, and it's making quite a splash. Unlike construction defects that focus on mold and water infiltration caused by heavy rain and/ or faulty construction, sound defects can happen daily. The current specified STC rating listed in the building codes still may not be good enough as most people are easily annoyed by loud neighbors. As a contractor/ architect/developer, how can you protect yourself against potential claims related to STC values? This seminar will cover what goes into an ASTM E-90 sound test, what types of materials improve or decrease STC values, how underperforming

SEMINAR GUIDE

walls can impact defect claims, fire-rated wall testing versus sound wall testing, third-party sound reports, and more.

PRESENTER

Don Pilz

Research and Development Manager, CEMCO

Don Pilz has invented multiple firestop products distributed in the U.S. and abroad. He has spent the last 15 years with CEMCO as a Research and Development Manager. Pilz has

authored articles in *Walls & Ceilings* magazine, is a frequent guest speaker for numerous industry events, and has written and presented several AIA-accredited courses.

Session 4C

Boosting Climate Resilience in the Aloha State with Cool Surfaces

Sponsored by Cool Roof Rating Council

Hawai'i is a leader in passive cooling and climate resilience as the first in the nation to adopt cool surfaces (cool roofs and cool exterior walls) into the statewide energy code. Attend this seminar to hear how cool

surfaces reduce energy use, produce cost savings, improve occupant comfort, combat the impacts of urban heat islands and extreme heat, and increase resilience and equity. Learn about Honolulu's updated cool surface code requirements, as well as LEED and Green Globes credits for heat island reduction; how to identify compliant products using a free, online resource; and gain access to tools for quantifying cool surface energy and cost savings.

PRESENTER

Sarah Yuko Schneider

Deputy Director, Cool Roof Rating Council

The Cool Roof Rating Council is a non-profit organization formed in 1998 to develop accurate and credible methods for evaluating and labeling the radiative properties of roofing and exterior wall products. Sarah has over

17 years of experience in the energy efficiency and sustainability sectors and oversees the organization's policy and standards development, various accreditations, code advocacy, and outreach and education activities in the U.S. and internationally.

Session 4D
